

PAYTRACE EMV 2.0

Security that's effortless.

PayTrace EMV 2.0 is our fast and easy card-present solution that is available from your mobile device. It's a secure, simple way to qualify commercial card transactions for Level III interchange rates.

Accepting chip cards is simple – merchants just need a computer with an Internet connection. You can also integrate our new EMV solution through our API. Transactions run immediately, allowing merchants to get back to running their business and qualify for better rates through interchange optimization.

With PayTrace EMV 2.0 you can:

- Reduce security scope with PayTrace Virtual Terminal
- Qualify B2B transactions for Level III rates
- Optimize Level III savings from the EMV mobile app
- Add in-person payments to your software solutions

- Send your Merchant Provider to sales@paytrace.com. We'll handle the rest.
